

# Sheri Standafer

Software Engineer

## Profile

Software Engineer with 4+ years of experience developing and maintaining web applications. Proven ability to work in a fast-paced environment and deliver quality software on time. Strong technical skills in Java, Spring, Hibernate, MySQL, HTML, CSS, and JavaScript. Excellent communication and interpersonal skills

## Employment History

### Lead Software Engineer at Google - Mountain View, CA

Feb 2022 - Present

- XX number of lines of code written in various languages including Java, Python and C++.
- YY years experience developing software applications using object-oriented design principles.
- ZZ awards received for innovation in software engineering practices such as automated testing, continuous integration and delivery (CI/CD), DevOps culture transformation.
- WW patents issued for new algorithms or processes related to software development optimization methods.

### Senior Software Engineer at Facebook - Menlo Park, CA

Sep 2019 - Dec 2021

- Increased the performance of a web application by 20% through code optimization techniques.
- Cut development time for new features by half through utilization of automated testing tools.
- Developed an innovative user interface that achieved widespread adoption throughout the company, resulting in 10% better customer satisfaction ratings.
- Improved existing software architecture to increase security and stability by 30%.
- Wrote custom algorithms that resulted in 40% faster response times for data-intensive operations.

## Certificates

### Certified Information Systems Security Professional (CISSP)

Oct 2020 - Dec 2020

### Certification in Control Self-Assessment (CCSA), The Institute of Internal Auditors (IIA)

Apr 2019 - Jul 2019

### Six Sigma Green Belt (SSGB) certification

Apr 2018 - Jun 2018

✉ [sheri.standafer@gmail.com](mailto:sheri.standafer@gmail.com)

☎ 765-903-7701

📍 584 Westford Street, Lowell, MA 01851

## Education

### Bachelor of Science in Software Engineering at Harvard University, Cambridge, MA

Aug 2015 - May 2019

I learned how to design, develop and test software using various programming languages and tools.

## Skills

Coding: Different coding languages such as Java, Python, etc.

Automated Testing: Using tools like Selenium to test software automatically.

Debugging: Identifying and fixing errors in code.

Problem Solving: Ability to identify problems and find solutions for them.

Version Control Systems: Using systems like Git or SVN to track changes made to code over time.
