Skills

Machining

CNC machines

Programming languages (G code, M code)

Safety procedures

Setup and operation of CNC machines

Blueprints reading and interpretation

Geometric dimensioning and tolerancing

Languages

English

Italian

Profile

I am a CNC Machinist with more than 5 years of experience. I have worked on both small and large projects, including creating custom parts for clients. My attention to detail and excellent problem solving skills allow me to create high-quality products that meet or exceed customer expectations. In addition, I have a strong understanding of the manufacturing process and can help identify areas where improvements can be made to increase efficiency and reduce costs.

Employment History

CNC Machinist at CNC Machinists Incorporated

Feb 2022 - Present

- Increased productivity by streamlining workflow and implementing new machining processes
- Reduced cycle time by 20% through process optimization
- Developed CNC programming skills to create efficient toolpaths for complex parts
- Trained other machinists on proper machine operation and best practices
- Maintained high quality standards while producing large volume of parts

CNC Programmer at State: Florida

Aug 2019 - Dec 2021

- Ran a CNC machine to produce over 100 widgets in one hour.
- Assembled and installed a new CNC machine on the production floor.
- Trained two other employees how to operate the CNC machines safely and efficiently.
- Developed and implemented a preventive maintenance plan for all of the company's CNC machines, which reduced downtime by 25%.
- Coordinated with vendors to procure parts and tools needed for repairs, modifications, or upgrades to CNC machines

Certificates

CNC Machine Operator Certification (CMOC)

Jan, 2022 - Present

CNC Programming Certification (CPC)

Feb, 2021 - Present

CNC Setup and Operation Certification (CSOC)

Jan, 2021 - Present

CNC Maintenance and Repair Certification (CMC)

Jul, 2020 - Present
