Profile

I am an experienced epidemiologist with a passion for public health. I have worked on a variety of projects focused on the identification and prevention of disease outbreaks. My work has involved designing and conducting studies, analyzing data, and developing recommendations for public health policy. I am skilled in working with diverse teams and have experience collaborating with partners across multiple sectors. I am committed to using my skills to improve the health of communities around the world.

Employment History

Research Epidemiologist at Johns Hopkins Bloomberg School of Public Health - Maryland

Mar 2022 - Present

- Led a team of 12 epidemiologists in investigating an outbreak of Legionnaires' disease, finding the source and putting together a plan to prevent future outbreaks.
- Investigated 100 cases of food poisoning, identifying the source as contaminated chicken and leading to recalls by 2 companies.
- Wrote 60 peer-reviewed articles on various topics related to epidemiology.
- Gave 50 presentations at national conferences on various topics related to epidemic investigations and prevention.
- Advised state and local health departments on how to best handle 10 separate outbreaks of infectious diseases.

Clinical Epidemiologist at Harvard T.H. Chan School of Public Health - Massachusetts

Aug 2017 - Feb 2022

- Led a team that conducted a study on the effects of smoking. The study found that smoking is linked to an increased risk of death from lung cancer.
- Conducted a study on the spread of HIV/AIDS in Africa and found that the disease is spreading rapidly through heterosexual activity.
- Led a team that conducted a large-scale study on obesity in America and found that obesity rates have tripled over the past 30 years.
- Conducted research on malaria transmission in Africa and developed new methods for mosquito control.
