

Benilde Scollon

Facilities Project Engineer

I am a Facilities Project Engineer with over 5 years experience in the industry. I have managed and executed projects of varying scope, size, and complexity. I am adept at developing project budgets, schedules, and plans; coordinating with contractors; overseeing construction activities; and ensuring that projects are completed on time and within budget. My engineering background has given me the skills to effectively communicate with architects, engineers, building owners/managers, government officials, and other stakeholders. I possess strong analytical abilities which allow me to quickly identify problems or potential risks related to my projects during all phases of development

Education

**Bachelor of Science in
Civil Engineering at The
University of Washington,
Seattle, WA**

Aug 2013 - May 2017

I've learned how to design and analyze structural systems, how to manage construction projects, and how to perform various civil engineering calculations.

Skills

Facilities Project Management

Construction Management

Contract Administration

Budgeting and Cost Control

Scheduling

Risk Assessment/Management

Employment History

Facilities Project Engineer II at Washington State Department of Transportation, WA

Jun 2022 - Present

- Successfully managed the construction of a new \$10 million factory, including coordinating with over 100 contractors and suppliers.
- Successfully oversaw the renovation of an old factory, which included gutting the interior and completely redesigning production line layouts. The project was completed on time and under budget.
- Identified potential safety hazards in factories and developed corrective action plans to mitigate those risks. Implemented these plans, resulting in a 50% reduction in injuries at facilities across North America .
- Developed a new buildings management system for tracking maintenance issues and equipment locations that reduced downtime by 25%.
- Spearheaded development of standard operating procedures for all facility-related activities, which increased efficiency by 15%.

Facilities Project Engineer I at King County Department of Natural Resources and Parks, WA

Aug 2017 - Apr 2022

- Spearheaded the successful completion of 3 major projects within budget and ahead of schedule.
- Managed a team of 5 engineers and technicians while maintaining a high level of productivity and accuracy.
- Oversaw all aspects of engineering design, construction coordination, quality control, and project closeout.
- Developed strong relationships with outside vendors and contractors to ensure smooth project execution.
- Demonstrated excellent problem solving skills by resolving complex issues in a timely manner.

Certificates

Certified Facilities Manager (CFM)

May 2021

Certified Energy Manager (CEM)

Nov 2019
