PROFILE

I am a medical science liaison with 6 years of experience in the pharmaceutical industry. I have worked on both the commercial and scientific sides of the business, giving me a well-rounded perspective on drug development. My main focus is on building relationships between scientists and clinicians to further medical knowledge and improve patient care. In my role as MSL, I have had numerous opportunities to serve as a conduit for information exchange between these two groups. Additionally, I have been able to lead educational programs and symposia at major national meetings such as ASCO, AACR, etc.

EMPLOYMENT HISTORY

● Medical Science Liaison at MSL Society

May 2022 - Present

- Completed field training program with an average rating of 4.8/5.
- Constructed and delivered presentations on scientific data to healthcare professionals, averaging 20 per month.
- Fielded approximately 100 unsolicited requests for information per week from target HCPs across all therapeutic areas.
- Led 3 successful uncontrolled diabetes patient case studies in the northeast region during 2017-2018.
- Successfully completed projects independently 75% of the time.
- Conducted ad Board meetings 4 times a year that included 6 different thought leaders in Nephrology.

● Regional Medical Science Liaison at Pharmaceutical Product Resource, Inc. (PPR)

Aug 2017 - Mar 2022

- Led 10 successful educational scientific outreach events with Opinion Leaders in the field of Gastroenterology.
- Presented at 5 national and international conferences on various topics within the GI disease state landscape.
- Authored 2 publications in well-respected, peer-reviewed journals pertaining to new study results and implications for clinical practice.
- Held weekly departmental meetings to ensure cross communication between MSL team members and other departments within company.
- Generated \$200K+ in potential business through continuous market analysis of current trends, unmet needs, etc.
- Played an integral role on 4 project teams responsible for developing Hereditary Angioedema (HAE) patient education materials.
