

Flarence Rettig

Principal Health and Safety Engineer

Profile

As a Principal Health and Safety Engineer with over 10 years experience, I have gained an in-depth knowledge of health and safety principles, procedures and regulations. My work has focused on developing and implementing effective health and safety programs for both private sector companies and public organizations. In addition to my program development experience, I also have investigations experience which allows me to effectively identify hazards and recommend corrective measures to mitigate risks. I am a strategic thinker who is able to develop long-term vision for organizational health needs while being responsive to immediate issues as they arise. As a result of my wide range of skills, I am confident that I can provide value as part of your team

Employment History
