GA 31419

PROFILE

I have over 4 years of experience as a practicing veterinarian. I am well-versed in both small and large animal care, and have a particular interest in avian medicine. In my most recent position, I was responsible for the medical care of over 500 animals at a busy urban animal hospital. I am confident in my ability to handle high-stress situations and remain calm under pressure. I possess excellent communication skills and work well with other members of the veterinary team, as well as clients.

EMPLOYMENT HISTORY

• Veterinary Pathologist at BluePearl Veterinary Partners (MI)

Mar 2022 - Present

- I delivered 3 litters of puppies via C-section while working overnights at the local 24 hour animal hospital.
- I created and now oversee all aspects of the veterinary program at the local zoo including multiple daily rounds, surgeries, preventative care and more for over 100 animals from 35 different species.
- In one year alone, I treated 1,500 sick or injured animals brought into our clinic by their owners or other vets.

• Veterinary Epidemiologist at VCA Animal Hospitals (Multiple States)

Aug 2018 - Jan 2022

- Developed a successful strategy for treating flea infestations in cats which resulted in a 80% reduction of treatment cases.
- Conducted research on feline heart health which led to the development of a new medication that is now used routinely to treat heart conditions in felines.
- Wrote a book on pet nutrition that became a best-seller and has been translated into 5 languages.
- Created an online course on dog training that has helped over 10,000 owners train their dogs effectively.
- Spent 2 weeks volunteering at an animal shelter in Thailand where I helped spay/neuter over 200 animals.

EDUCATION

DVM at Washington University, St. Louis, MO

Sep 2014 - May 2018

Some of the technical skills I learned while studying for DVM in school include: animal husbandry, pharmacology, medical diagnostics, and surgery.
